

TopSolid *Design* 2007

NEW

Industry Leading Hybrid Design

- Strongest hybrid solid/surface modeler on the market
- TopSolid fully supports 64-bit operating systems
- Intelligent 2D sketcher
- Industry leading hybrid 3D sketcher
- Automated assemblies with smart components
- BOM's are fast, easy and user definable
- Powerful associative 2D drawings

The Integrated CAD/CAM/ERP Solution

TopSolid'Design 2007

An integrated CAD solution for all industries

TopSolid'Design is a fully-integrated and associative CAD software. TopSolid gives you the ability to work the way you want to work, with total freedom. With TopSolid, you can work with wireframe, solids, surfaces and assemblies simultaneously without any limitations. Add to that the mechanical simulation, sheet metal processing and smart assembly components, and you have the best CAD solution on the market today.

Easy to Learn and Use

- Learn the basics in a few days.
- Master them in a few months.

Strongest Hybrid Solid/Surface Modeler on the Market

- Create solids quickly and intelligently.
- Work with real surfaces in an easy-to-use spatial environment.
- Work with as many objects as you want, in place, without worrying about assembly structure.
- Add complex surfacing to your solid model (and vice versa).

Intelligent 2D Sketcher

- Constraints are added automatically.
- Easy to add, modify or remove constraints.
- Sketches created up to 70% faster than the competition.

Industry Leading Hybrid 3D Sketcher

- Work in 2D or 3D without limitations.
- Complex surfacing is much easier.
- Supports tangency and continuity between any curve type.
- Up to an 80% gain in productivity due to a real 3-dimensional environment.

Automated Assemblies

- Assembly mates dynamically detected and applied.
- Dynamic assembly motion allows you to test your assembly.
- Dynamic collision detection will stop the motion based on the first collision.
- Kinematic animations allow you to test the mechanical motion.

Smart Components

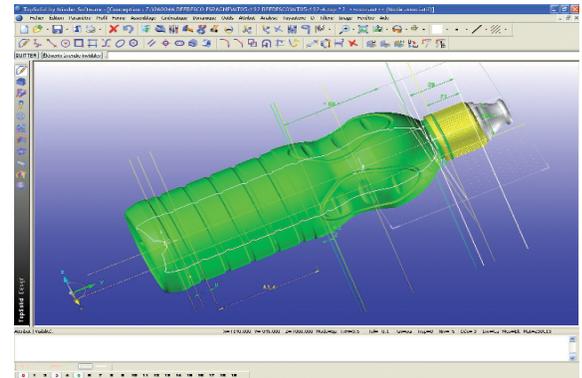

- Add the associated modeling process when inserted.
- Users can create their own smart components.
- Smart components save time and make you more efficient.

Powerful associative 2D drawings

- Automated view creation.
- Complex shapes can be projected as splines or tangent lines and arcs.
- BOM's are fast, easy and user definable.
- Automated/automatic dimensioning and ballooning.

Additional Information

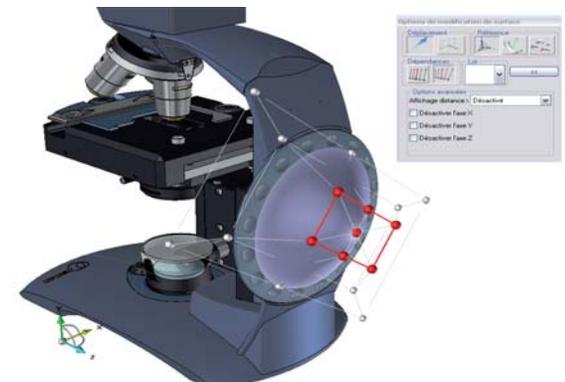

- Parasolid® based solids.
- Standard data translators – Parasolid®, ACIS®, SolidWorks®, SolidEdge®, Unigraphics®, IGS, STEP, DWG, DXF, STL

The TopSolid sketcher makes it easy to create anything.

TopSolid 2007 easily manages large assemblies.

Modification of control points with TopSolid'Design.
